

LOCK 3000 Belt Trial Results

Children's of Alabama recently conducted a trial of Gus Gear's LOCK 3000 Belt to evaluate caregiver satisfaction and assess the device's effectiveness in reducing complication rates. Below are their results.

Parent Feedback

- 100% said experience improved.
- 100% said belt was comfortable.
- 75% said it was easy to apply.
- There was a positive impact on infusion and ED visits.

Provider Feedback

- 100% rated the belt 4/4 for coverage and satisfaction.
- Based on these trial results, the device was accepted for hospital-wide use.

Parent Quotes

“If I take it off for a second, he screams wanting it back on.”

“This has significantly decreased my stress level.”

Provider Quotes

“This has helped us as a team to tolerate much higher activity level better.”

“This mom loves the belt.
(Pre LOCK 3000 Belt, patient dislodged their G-Tube 4x in 2 weeks. They have had 0 dislodgments after using the belt.)”
